

Santron PC-Based Wired Uroflowmeter Model: SANURO4UL

PC-based Wired Uroflowmetry:
Where Urology Diagnostics Meets Accuracy
and Reliability.

SPECIFICATIONS:

- **Measurement range :-** Flow rate : 0-50 ml/sec.
Volume : 0-1000ml.
- **Accuracy :** +/- 2% of voided volume
- **Mode of Measurement :** Auto & Hesitancy Mode.
- **Sensor :** Gravimetric (weight) type
- **Software :** Windows operating software
- **Connectivity :** USB
- **Output Report :** Colour / B&W printout on any Inkjet and Laser Printer
- **Calculated parameters :** Voided Volume, Average Flow rate, Max. Flow rate, Computed Max. Flow rate, Voided Time, Flow time, Max. Flow Time, Delay Time, Computed Av. Flow rate, Interval Time

Device

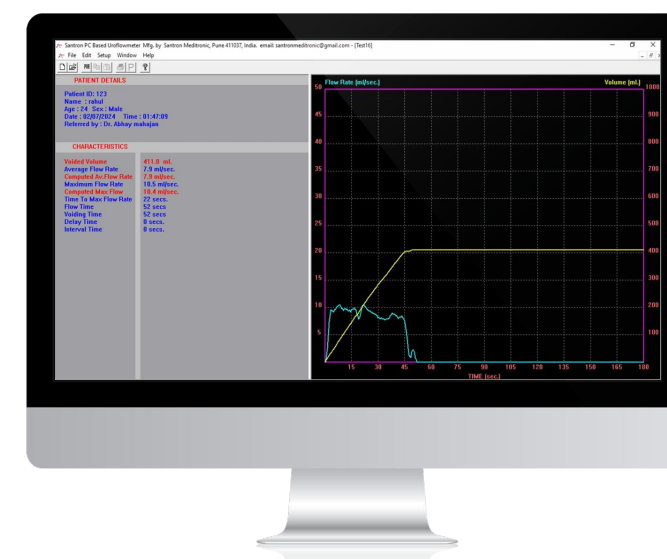

Intuitive Data Entry:

Our software simplifies patient recording and testing, ensuring ease of use for all users.

Detailed Database:

Store & manage comprehensive patient information & test results effortlessly.

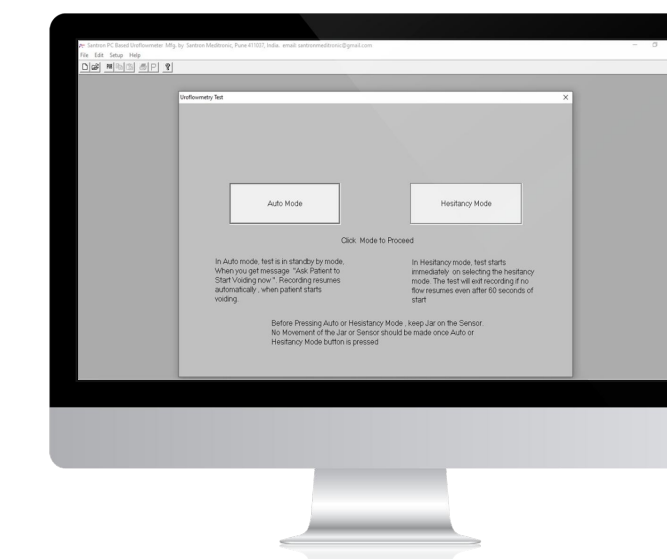

Customizable Reports:

Customize reports with hospital or clinic letterhead details for a professional presentation.

Enhanced Analysis:

Benefit from advanced analysis capabilities with ICS standard nomograms, facilitating precise interpretation of uroflowmetry data.

User-friendly Software:

Our software offers an intuitive interface and customizable features, ensuring ease of use and seamless integration.

Auto-manual Modes of Operation:

Store & manage comprehensive patient information & test results effortlessly.

STANDARD EQUIPMENT

Interface Device • Power Adapter • Uroflow Sensor • 1 Funnel 1 No. • 1 Litre Jar 1 No.
• SS Height-Adjustable Stand • Commode Seat (Optional)

Note: WiFi Colour InkJet Printer required to print the report can be purchased by the user locally.
